# Key Points

## Today through Sunday

- No significant weather impacts expected throughout the Region

## Monday and Tuesday

- Thunderstorm activity increases on Monday across New Mexico and portions of the TX/OK Panhandles and NW TX
- This activity looks to shift eastward on Tuesday into Oklahoma and central Texas
  - As of now, the severe weather potential each day appears to be relatively low
  - Also, the heavier rain potential for this time period is currently forecast over the Texas Panhandle into NW TX; and this is mostly west of the areas that saw heavy rainfall over this past week
